

Carleton University
Department of Systems and Computer Engineering
SYSC 4106 Group Projects Presentation Evaluation (Fall 2005)

Project Group: _____

Objectives	Very Good	Good	Average	Below Average	N/A
1. Quality and layout of the slides (sequencing, clarity, conciseness, accuracy, and completeness)					
2. Quality of presentation (logical, flow of events, and fluency)					
3. Engineering Techniques Used (modern concepts and methods)					
4. Adequate background information (preparation, information, literature review, etc)					
5. Relevance to Software Product Management.					
5. Conclusions and recommendations					

Project mark over 15% (Instructor and TA only)	
---	--

A grade of **A** (A+ or A or A-) is given for outstanding achievement. **(12% to 15%)**

- The student demonstrated exceptional ability and complete mastery of the subject material.
- The student has made a contribution on which others can build.

A grade of **B** (B+ or B or B-) represents good, solid professional engineering work **(10.5% to 11.85%)**

- The student has met the original objectives in a timely, competent manner.
- The student is fluent in the subject matter.

A grade of **C** (C+ or C or C-) represents below-average performance **(9% to 10.35%)**

- The student has an imperfect understanding of the concepts, and poorly developed ability to solve problems.
- The student has met some of the original objectives, but was unable to finish due to a lack of effort or insight on his/her part.

A grade of **D** represents a failure in the group project. **(< 9%)**
