Moving peers in distributed, location-based peer-to-peer overlays

Conference Paper Jan 2017

 Tobias Amft ·  Kalman Graffi

In the past decades, various concepts of peer-to-peer (P2P) systems have been realized in desktop applications for stationary PCs. Last recent years show that computers have evolved to handy devices which can be used nearly everywhere, not only at home. For this reason, location-based services which...

Social discovery using longitudinal spatial smartphone sensing

Conference Paper Apr 2014

 Udayan Kumar ·  Ahmed Helmy

A new generation of social discovery and crowd-sourced location-based services promise to integrate mobile computing into our lives more than ever. An essential component in these services is the neighbor or peer selection, that is also needed for peer-to-peer (P2P) mobile applications and multiplayer...

Sep 2015

 Muhammad Salman Raheel ·  Raad Raad ·  Christian H. Ritz

This paper studies the resource allocation problem for efficiently utilizing network resources for distributing video over a peer to peer mobile ad hoc network. We define an NP complete linear optimization problem to handle the upload bandwidth available across each node. Scalable video codi...

Hive.js: Browser-Based Distributed Caching for Adaptive Video Streaming

Article Feb 2015

 Roberto Roverso ·  Mikael Hogqvist

Peer-to-peer (P2P) technology has long been considered a natural complement to standard CDN infrastructure for video distribution since it greatly reduces costs and improves quality of user experience. However, P2P solutions have traditionally required the installation of additional software or...
